Memorandum: Lord Mayor
Deputy Lord Mayor
Elected Members

Response to Question Without Notice

SAND ON MACQUARIE STREET, SOUTH HOBART

Meeting: City Infrastructure Committee

Meeting date: 24 June 2020

Raised by: Lord Mayor Reynolds

Question:

Could the Director please advise if anything can be done to reduce the amount of sand that is being dropped in the South Hobart shopping area of Macquarie Street?

Response:

The property in question is a long standing landscaping supplies operation.

Due to the nature of its operations, sand and soil etc finds its way onto Macquarie Street, primarily due to the movement of delivery and private vehicles on and off the site.

To counter the higher level of street detritus, the City undertakes a higher frequency of street sweeping than required for other similar locations.

- Mechanical sweeping of the Roadway - Mon, Wed and Fri
- Mechanical sweeping of the Pavement - Wed and Fri
- Service Truck inspections - Wed and Fri

The landscaping business funds all costs associated with the intensified sweeping program.

As signatory to this report, I certify that, pursuant to Section 55(1) of the Local Government Act 1993, I hold no interest, as referred to in Section 49 of the Local Government Act 1993, in matters contained in this report.

Glenn Doyle
